Interfaces

Srinivas Bollapragada
General Electric Global Research Center, Editor-in-Chief

Interfaces publishes manuscripts focusing on the practice of operations research and management science and the impact this practice has on organizations throughout the world. The most appropriate papers are descriptions of the practice and implementation of OR/MS in commerce, industry, government, or education. The journal publishes papers in all areas of OR/MS including operations management, information systems, finance, marketing, education, quality, and strategy.

For 40 years, Interfaces has been serving the field of operations research and management science (OR/MS) as the premier practice journal. Articles from the journal help advance the practice of OR/MS, stimulate research in academia and industry, and are widely used for classroom instruction. The journal is home to Edelman Award papers, which describe outstanding examples of the practice of OR/MS and help bring visibility to the profession.
