Publication List of Daniel P. Heyman

Queueing Theory and Applications

Daniel P. Heyman. Optimal operating properties for M/G/1 queues. *Opens. Res.*, 16:362–382, 1968.

D. P. Heyman and K.T. Marshall. Bounds on the optimal policy for a class of single-server queues. *Opens. Res.*, 16:1138–1146, 1968.

Daniel P. Heyman. A priority queueing system with server interference. *SIAM J. Appl. Math*, 17:74–82, 1973.

B. Avi-Itzhak and D. P. Heyman. Approximate queueing models for multiprogramming computer systems. *Opens. Res.*, 21:1212–1230, 1973.

Daniel P. Heyman. An approximation for the busy period of the M/G/1 queue using a diffusion model. *J. Appl. Prob.*, 11:159–169, 1974.

D. P. Heyman and M. Segal. Conditional delays measured in events for the M/M/c queue. *Opens. Res.*, 22:575–581, 1974.

Daniel P. Heyman. A diffusion model approximation for the GI/G/1 queue. *Bell Syst. Tech. J.*, 54:1637–1646, 1975.

D. P. Heyman and S. Stidham. The relation between customer and time averages in queues. *Opens. Res.*, 28:983–994, 1980.

Daniel P. Heyman. Comments on a queueing inequality. *Mgt. Sci.*, 26:956–959, 1980.

D. P. Heyman. On Ross's conjecture about queues with non-stationary poisson arrivals. *J. Appl. Prob.*, 19:245–249, 1982.

D. P. Heyman and W. Whitt. The asymptotic behavior of queues with time-varying arrival rates. *J. Appl. Prob.*, 21:143–156, 1984.

Daniel P. Heyman. The push-out priority queue. *Opens. Res.*, 33:397–403, 1985.

Daniel P. Heyman. Asymptotic marginal independence in large networks of loss systems. *Annals of Opens. Res.*, 8:57–73, 1987.

Daniel P. Heyman and Ward Whitt. Limits for queues as the waiting room grows. *QUESTA*, 5:381–392, 1989.

Inventory Theory

Daniel P. Heyman. A model for cash balance management. *Mgt. Sci.*, 19:1407–1413, 1973.

B. Hoadley and D. P. Heyman. A two-echelon inventory model with purchases, dispositions, shipments, returns and transshipments. *Naval Reseach Logist. Quart.*, 24:385–405, 1977.

Daniel P. Heyman. Optimal disposal properties for a single-item inventory system with returns. *Naval Reseach Logist. Quart.*, 24:385–405, 1977.

Daniel P. Heyman. Return policies for an inventory system with positive and negative demands. *Naval Reseach Logist. Quart.*, 25:581–596, 1978.

Simulation

M. Basu, G. Dutta, T. W. Morgan, and D. P. Heyman. A comparison study of the queueing network analyzer with a CSMA/CD simulation. In *Proc. Sixth International Conference on Computers and Communications*, pages 379–383, 1987.

Sigrún Andradóttir, Daniel P. Heyman, and Teunis J. Ott. Smoothing methods for variance reduction in simulations of Markov chains. *ACM Trans. on Modeling and Computer Simulation*, 3:167–189, 1993.

David M. Cohen and Daniel P. Heyman. An almost regenerative simulation of video teleconferencing traffic. In *Proc. Winter Simulation Conference*, pages 489–498, 1993.

David M. Cohen and Daniel P. Heyman. A parallel discrete event simulation of video teleconferencing traffic in ATM networks. In *Proc. IEEE INFOCOM*, pages 894–901, 1993.

David M. Cohen and Daniel P. Heyman. A simulation study of video teleconferencing traffic in ATM networks. *IEEE Trans. Ckts. and Systems Vid. Technology*, 3:408–420, 1993.

Sigrún Andradóttir, Daniel P. Heyman, and Teunis J. Ott. On the choice of alternative measure in importance sampling with Markov chains. *Opens. Res.*, 43:509–519, 1995.

Sigrún Andradóttir, Daniel P. Heyman, and Teunis J. Ott. Potentially unlimited variance reduction in importance sampling of Markov chains. *Adv. Appl. Prob.*, 28:166–188, 1996.

W. K. Grassmann, M. I. Taksar, and D. P. Heyman. Regenerative analysis and steady-state distributions for Markov chains. *Opens. Res.*, 33:1107–1116, 1985.

D. P. Heyman. Further comparisons of some direct methods for computing stations distributions of Markov chains. *SIAM J. Alg. and Disc. Meth.*, 8:52–60, 1987.

Daniel P. Heyman and Alyson Reeves. Numerical solution of linear equations arising in Markov chain models. *ORSA J. Computing*, 1:52–60, 1989.

W. K. Grassmann and D. P. Heyman. Equilibrium distribution of block-strucured Markov chains with repeating rows. *J. Appl. Prob.*, 27:557–576, 1990.

Daniel P. Heyman. Approximating the stationary distribution of an infinite stochastic matrix. *J. Appl. Prob.*, 28:96–103, 1991.

W. K. Grassmann and D. P. Heyman. Computation of steady-state probabilities for infinite-state Markov chains with repeating rows. *ORSA J. Comput.*, 5:292–303, 1993.

Daniel P. Heyman. A direct algorithm for computing the stationary distribution of a p-cyclic Markov chain. In Carl D. Meyer and Robert J. Plemmons, editors, *Linear Algebra, Markov chains, and Queueing Models.* Springer-Verlag, 1993.

Daniel P. Heyman. Accurate computation of the fundamental matrix of a Markov chain. *SIAM J. Matrix Anal. and Appl.*, 16:954–963, 1995.

D. P. Heyman. A decomposition theorem for infinite stochastic matrices. *J. Appl. Prob.*, 32:893–901, 1995.

Meredith J. Goldsmith and Daniel P. Heyman. Comparisons between aggregation/disaggregation and a direct algorithm for computing the stationary probabilities of a Markov chain. *ORSA J. Computing*, 7:101–108, 1995.

D. P. Heyman and D. P. O'Leary. What is fundamental for Markov chains: First passage times, fundamental matrices, and group generalized inverses. In William J. Stewart, editor, *Computations with Markov chains*, pages 151–162. Kluwer, 1995. (Proceedings of the 2nd International Workshop on the Numerical Solution of Markov chains).

David M. Cohen, Daniel P. Heyman, Asya Rabinovitch, and Danit Brown. A parallel implementation of the GTH algorithm. *ORSA J. Computing*, 9:218–223, 1997.

Daniel P. Heyman and Diane P. O'Leary. Overcoming instability in computing the fundamental matrix for a Markov chain. *SIAM J. Matrix Anal. Appl.*, 19:534–540, 1998.

Coded Video Traffic Source Modeling

D. P. Heyman, T. V. Lakshman, and A. Tabatabai. Statistical analysis and simulation study of video teleconference traffic in ATM networks. *IEEE Trans. on Ckts. and Systems for Video Technology*, 2:49–59, 1992.

David M. Cohen and Daniel P. Heyman. A simulation study of video teleconferencing traffic in ATM networks. *IEEE Trans. Ckts. and Systems Vid. Technology*, 3:408–420, 1993.

David M. Cohen, Daniel P. Heyman, and Amy R. Reibman. Comparisons among models of cell losses for video conferences. In 6^{th} *International Workshop on Packet Video*, 1994.

D. P. Heyman, T. V. Lakshman, A. Tabatabai, and H. Heeke. Modeling teleconference traffic from VBR video coders. In *Proc. ICC '94*, 1994.

D. P. Heyman, T. V. Lakshman, and A. Tabatabai. Statistical analysis of an MPEG2-coded VBR movie source. In H. L. Bertoni, Y. Yang, and S. Panwar, editors, *Multimedia Communications and Video Coding*. Plenum Press, 1996.

Daniel P. Heyman and T. V. Lakshman. Source models for VBR broadcast-video traffic. *IEEE/ACM Trans. Networking*, 4:40–48, 1996.

Daniel P. Heyman and T. V. Lakshman. What are the implications of long-range dependence for VBR-video traffic engineering? *IEEE/ACM Trans. Networking*, 4:301–317, 1996.

Daniel P. Heyman. The GBAR source model for VBR video-conferences. *IEEE/ACM Trans. Networking*, 5:554–560, 1997.

Communication Protocol Performance Modeling

Daniel P. Heyman. An analysis of the carrier-sense multiple-access protocol. *Bell Syst. Tech. J.*, 61:61, 1982.

Daniel P. Heyman. Data-performance analysis of Fasnet. *Bell Syst. Tech. J.*, 62:2547–2560, 1983.

Daniel P. Heyman. The effects of random message lengths on the performance of the CSMA/CD protocol. *IEEE Trans. on Commun.*, COM-35:547–553, 1986.

Daniel P. Heyman. A performance model of the credit manager algorithm. *Computer Networks and ISDN Systems*, 24:81–91, 1992.

Anwar Elwalid, Daniel P. Heyman, T. V. Lakshman, Debasis Mitra, and Alan Weiss. Fundamental bounds and approximations for ATM multiplexers with applications to design and admission control for video teleconferencing traffic. *IEEE J. on Select. Areas. Commun.*, 13:1004–1016, 1995.

Broadband Data Traffic and Internet Performance Modeling

Daniel P. Heyman. Some issues in performance modeling of data teletraffic. *Performance Evaluation*, 34:227–247, 1998.

V. Bolotin, J. Coombs-Reyes, D. P. Heyman, Y. Levy, and D. Liu. IP characterization for planning and control. In P. Key and D. Smith, editors, *Teletraffic Engineering in a Competitive World*, pages 425–436. Elsevier, 1999. (Proceedings of ITC '16).

Daniel P. Heyman. Performance implications of very large service-time variances. *Performance Evaluation*, 40:47–70, 2000.

D. P. Heyman, T. V. Lakshman, and D. Liu. Assessing the effects of short-range and long-range dependence on overflow probabilities. In 13^{th} *ITC Specialist Seminar*, 2001.

H.-P. Schwefel, D. P. Heyman, M. Jobmann, and D. Hoellisch. Accuracy of TCP performance models. In F. Huebner and R. van der Mei, editors, *Internet Performance and Control of Network Systems III*, 2002. SPIE vol. 4523.

D. P. Heyman, T. V. Lakshman, and Arnold L. Neidhardt. A new method for analyzing feedback-based protocols with applications to engineering web traffic over the internet. *Computer Communications*, 26:785–803, 2003.

Daniel P. Heyman and David Lucantoni. Modeling multiple traffic IP streams with rate limits. *IEEE/ACM Trans. Networking*, 11:948–958, 2003.

Daniel P. Heyman. Sizing backbone internet links. *Opens. Res.*, 53:575–585, 2005.

Nonlinear Programming Applications

D. Heyman, J. M. Lazorchak, D. S. Sibley, and W. E. Taylor. An analysis of tapered access charges for end users. In P. C. Mann and H. M. Trebing, editors, *New Regulatory and Management Strategies in a Changing Market Environment.* The Institue of Public Utilities, Michigan State University, 1987.

D. Heyman, D. S. Sibley, and W. E. Taylor. Optional tarrifs for access in the FCC's price cap proposal. In M. Einhorn, editor, *Price Caps and Incentives in the Telecommunications Industry.* Kluwer, 1991.

Daniel P. Heyman. Another way to solve complex chemical equilibria. *Opens. Res.*, 38:355–358, 1990.

Database Models

Daniel P. Heyman. Mathematical models of database degradation. *ACM Trans. Database Syst.*, 7:615–631, 1982.

Daniel P. Heyman and S. Tsur. Disk performance in an transaction-oriented system. *SIAM J. on Computing*, 13:669–681, 1984.

Survey Articles

Daniel P. Heyman. Queueing theory. In S. I. Gass and C. M. Harris, editors, *Encyclopedia of Operations Research and Mangement Science*, pages 554–561. Kluwer, 1996.

Robert C. Cooper and Daniel P. Heyman. Teletraffic theory and engineering. In Fritz E. Froehlich and Allen Kent, editors, *Encyclopedia and Telecommunications*, pages 453–483. Marcel Dekker, 1998.

Daniel P. Heyman and T.V. Lakshman. Long-range dependence and queueing effects for VBR video. In Kihong Park and Walter Willinger, editors, *Self-Similar Network Traffic and Performance Evaluation*, pages 285–318. Wiley Interscience, 2000.

D. Heyman. Numerical methods in queueing theory. In D. N. Shanbhag and C. R. Rao, editors, *Handbook of Statistics, vol. 21*, pages 407–429. North-Holland, 2003.

Books

Daniel P. Heyman and Matthew J. Sobel. *Stochastic Models of Operations Research*, volume 1. McGraw-Hill, New York City, 1982.

Daniel P. Heyman and Matthew J. Sobel. *Stochastic Models of Operations Research*, volume 2. McGraw-Hill, New York City, 1984.

D. P. Heyman and M. J. Sobel, editors. *Stochastic Models*, volume 2 of *Handbooks in Operations Research and Management Science*. North-Holland, New York, 1990.

Miscellaneous

Brian A. Coan and Daniel Heyman. Reliable software and communication III: congestion control and network reliability. *IEEE J. Select. Areas Commun.*, 12:40–45, 1994.

Daniel P. Heyman, Tamra Carpenter and Iraj Saniee. Studies of random demands on network costs. *Telecom Sys*, 10:409–421, 1998.
