Summary Information

Repository:	Massachusetts Institute of Technology. Institute Archives and Special Collections
Creator:	Forrester, Jay Wright
Title:	Jay Wright Forrester papers
ID:	MC.0439
Date [inclusive]:	1940-circa 2000
Physical Description:	136.2 Cubic Feet (134 record cartons, 5 manuscript boxes, 1 half manuscript box, 1 flat storage box, 1 tube, 3 folios, 1 cassette box)
Physical Location:	Materials are stored off-site. Advance notice is required for use.
Language of the Material:	English

Citation

Jay Wright Forrester Papers, MC 439, box X. Massachusetts Institute of Technology, Institute Archives and Special Collections, Cambridge, Massachusetts.

Biography

Jay Wright Forrester, 1918- , BS in electrical engineering, 1939, University of Nebraska; SM in electrical engineering, 1949, Massachusetts Institute of Technology, was director of the MIT Digital Computer Laboratory, 1946-1951, and was responsible for the design and construction of Whirlwind I, one of the first high-speed digital computers. He invented magnetic core memory, which for many years was the standard memory device for digital computers. As head of the Digital Computer Division of MIT's Lincoln Laboratory, 1952-1956, he guided the planning and technical design of the Air Force SAGE system for continental air defense. In 1956 he became professor of management at the MIT Sloan School of Management, where his work on the development of computer modeling and analysis of social systems led to the field now know as systems dynamics. He became Germeshausen Professor in 1972 and Germeshausen Professor emeritus and senior lecturer in 1989. His many books include *Industrial*

Dynamics (1961), *Systems Dynamics in Management Education* (1985), and *The City: Growth, Stagnation, and Revival* (1968).

^ Return to Table of Contents

Scope and Contents

Forrester's research is documented in records about his patents, including information about magnetic core memory lawsuits, and computation notebooks. Also included are copies of his speeches and files of speech invitations he declined. There are drafts of his book The City: Growth, Stagnation, and Revival, and background material for other books and articles. Also included are correspondence with colleagues and government officials, information about corporate consulting, course notes of classes he taught at MIT, and interview transcripts of an oral history of Forrester conducted in 1970. An audiocassette recording of a 1975 interview with Forrester, conducted by the staff of the London Science Museum, includes his comments on the development of the electronic digital computer, Vannevar Bush, and Project Whirlwind.

Access note

The collection is open for research; however, the collection is not yet fully processed and may need to be screened before use. In accordance with MIT Policy, there may be restrictions on access to MIT records.

Source of Acquisition

Materials were given to the Institute Archives and Special Collections by Jay Forrester.

Appraisal note

Needs review.

Conditions Governing Use

Condition of media in the collection needs to be reviewed. There may be restrictions on use.

Intellectual Property Rights

Access to collections in the Institute Archives and Special Collections is not authorization to publish. Separate written application for permission to publish must be made to the Institute Archives. Copyright of some items in this collection may be held by respective creators, not by the donor of the collection.
