List of Publications

1. On the Dynamics of Capital-Goods and Consumption-Goods Output (Romanian). *Probleme Economice, VIII*, 1955, No. 12.

2. The Relation Between the Growth of Labour Productivity and the Wage Level (R). *Probleme Economice, IX*, 1956, No. 4.

3. Technical Progress and the Relation Between the Growth Rates of the Two Production Sectors (R). *Probleme Economice, X*, 1957, No. 3.

4. Economic Aspects of Automation (R). Proceedings of the Conference on Industrial Automation, June 1957, Bucharest (Abstract in *Probleme de Automatizare, I*, 1960, R).

5. Certains aspects de la correlation entre l'augmentation de la productivite du travail et des salaires. *Etudes Economiques* (Paris), 1957, No. 102-103.

6. Technickeskii progres na nyneshnem etape i sootnoshenie tempov rosta dvuh podrazdelenii. *Revue des Sciences Sociales*, 1957, II.

7. *On the Marxian View of Keynesianism* (R). Editura Politica, Bucharest, 1958, 220

8. A Dynamic Model: The Relation Between Accumulation, Consumption and the Growth of National Income in a Socialist Economy (R). Institute of Economic Research, 1958 (unpublished monograph, 235 pp.).

9. Mathematics and the Planning of Transportation (R) (with P.L. Ivanescu). *Probleme de Automatizare, II*, 1960.

10. Linear Programming in Transportation (R) (with P.L. Ivanescu). *Revista de Statistica, IX*, 1960, No. 7.

11. The Transportation Problem with Interchangeable Centers (R) (with P.L. Ivanescu). *Studii si Cercetari Matematice, XI*, 1960, No. 2.

12. Applications of Mathematics in Economics (R). *Gazeta de Matematica si Fizica*, seria A, 1960, No. 11.

13. On the Use of Input-Output Models (R). *Revista de Statistica, IX*, 1960, No. 12.

14. Optimization of the Development Plan of an Industry (R) (with P.L. Ivanescu). *Probleme de Automatizare, III*, 1960, 25-34.

15. The Transportation Problem with Variable Centers (R) (with P.L. Ivanescu). *Studii si Cercetari Matematice, XII*, 1961, No. 2.

16. A Method for Solving the Transportation Problem (R) (with P.L. Ivanescu). *Comunicarile Academiei R.P.R.*, XI, 1961, No. 9.

17. Transportation Problems with Variable Data (with P.L. Ivanescu). *Revue de Mathematiques Pures et Appliquees*, VI, 1961, No. 4.

18. Transportation of Nonhomogeneous Products (R) (with P.L. Ivanescu). *Studii si Cercetari Matematice*, XIII, 1962, No. 1.

19. *Study on the Use of Mathematics in Solving the Problems of Optimal Allocation of Wood Resources* (R). ISPF (Research and Designing Institute for Forestry), Bucharest, 1962 (mimeographed volume, 207 pp.)

20. On the Transportation Problem - Part I (with P.L. Ivanescu). *Cahiers du Centre d'Etudes de Recherche Operationnelle (Bruxelles), 4*, 1962, No. 2.

21. On the Transportation Problem - Part II (with P.L. Ivanescu). *Cahiers du Centre d'Etudes de Recherche Operationnelle (Bruxelles), 4*, 1962, No. 3.

22. Dominance in Linear Programming (R). *Studii si Cercetari Matematice, XIII*, 1962, No. 3.

23. Mathematical Programming and the Allocation and Transportation of Romanian Firewood (R). (with A. Corban). ISPF, Bucharest, 1962 (mimeographed report).

24. Zadachi perevozok s parametrami (with P.L. Ivanescu). *Biuleten nauchnoi informatzii Akademii R.N.R*, 1962, No. 2.

25. Application de la programmation lineaire dans les transports roumains (with P.L. Ivanescu). *Etudes Economiques*, Paris, 1962, No. 140.

26. Application of Mathematical Programming to the Allocation of Coniferous Logs (R). ISPF, Bucharest, 1962 (mimeographed report).

27. Stability of Optimal Solutions of Transportation Problems with Changing Costs (R) (with P.L. Ivanescu). *Comunicarile Academiei R.P.R*, XIII, 1963, No. 3.

28. A Mathematical Model for the Optimal Utilization of Wood Resources (R). *Revista de Statistica, XII*, 1963, No. 5, pp. 62-75.

29. A Mathematical Model for Studying the Properties of the Coefficient of Normal Efficiency of Investment (R). *Proceedings of the Colloquium on the Approximation of Functions*, November 1963, Cluj.

30. Linear Programming with Zero-One Variables (R). *Proceedings of the Scientific Session of the Central Statistical Office*, December 1963, Bucharest, 13-20.

31. Application of Mathematical Programming to Forest Management. *Studies in Statistics. Proceedings of the Third Scientific Session on Statistics,* December 5-7, 1963, Bucharest, 21-25.

32. Un algorithme additif pour la resolution des programmes lineaires en variables bivalentes. *Comptes Rendus de l'Academie des Sciences*, (Paris), T. 258, 1964, No. 15, pp. 3817-3820.

33. Extension de l'algorithme additif a la programmation en nombres entiers et a la programmation nonlineaire. *Comptes Rendus de l'Academie des Sciences* (Paris), T. 258, 1964, No. 21, 5136-5139.

34. Applications of Mathematics to the Planning of Transportation of Firewood (R) (with A. Corban). *Revista Padurilor*, 1964, No. 4.

35. On the Generalized Transportation Problem (with P.L. Ivanescu). *Management Science, 11, No. 1*, September 1964, pp. 188-202.

36. An Additive Algorithm for Solving Linear Programs in Zero-One Variables, with Extension to Integer Programming. *Proceedings of the International Symposium on Mathematical Programming*, July 1964, London.

37. Mathematical Programming in the Sawing-Mill (R) (with V. Sachelarescu). *Revista de Statistica, XIII*, 1964, No. 10, 49-60.

38. An Equilibrium Model with Fixed-Product-Mix (R). *Proceedings of the Colloquium on Mathematical Economics*, Iassy, December 1964.

39. The Parametric Weighted Distribution Problem (R). *Proceedings of the Colloquium on Mathematical Economics*, Iassy, December 1964.

40. Deuxieme variante de la methode de decomposition quasi-primale-duale pour des programmes lineaires. *Comptes Rendus de l'Academie des Sciences* (Paris), T. 261, 1964, pp. 2809-2811.

41. Solutions of large-Scale Transportation Problems through Aggregation. *Operations Research, 13*, 1965, No. 1, 82-94.

42. The Problem of Optimal Timetables (with G. Mihoc). *Revue de Mathematiques Pures et Appliquees, X*, 1965, No. 4, pp. 381-388.

43. An Additive Algorithm for Solving Linear Programs with Zero-one Variables. *Operations Research, 13*, 1965, No. 4, pp. 517-546.

44. Mathematical Models for Optimizing the Development Plan of the Electric Power Industry (R) (with E. Costin). *Proceedings of the Colloquium on the Theory of Convex Functions*, Cluj, July 1-5, 1965.

45. Une methode de decomposition quasi-primale-duale pour les programmes lineaires. *Comptes Rendus de l'Academie des Sciences* (Paris), T. 261, 1965, 2572-2574.

46. The Dual Method for the Generalized Transportation Problem. *Management Science, 12*, No. 7, March 1966, 555-568.

47. La methode du filtre (l'algorithme additif accelere) pour la resolution des programmes lineaires en variables bivalents. *Comptes Rendus de l'Academie des Sciences* (Paris), T. 262, 1966, No. 13, 766-769.

48. Adaptation de l'algorithme additif accelere a la programmation mixte. *Comptes Rendus de l'Academie des Sciences* Paris, T. 262, 1966, No. 14, 831-834.

49. An Infeasibility-Pricing Decomposition Method for Linear Programs. *Operations Research, 14*, 1966, No. 5, 847-873.

50. Discrete Programming by the Filter Method, with Extension to Mixed Integer Programming and Application to Machine Sequencing. International Computation Center, Rome, Report No. 66/10, November 1966.

51. Finding a Minimaximal Path in a Disjunctive PERT Network. *Theorie des Graphes. Actes des Journees Internationales de l'I.C.C.*, Rome 1966. Dunod (Paris), Gordon and Breach (New York), 1967.

52. Discrete Programming by the Filter Method. *Operations Research, 15*, 1967, No. 5, 915-957.

53. A Note on the Branch and Bound Principle. *Operations Research, 16*, 1968, 442-445. (Errata, p. 886)

54. Duality in Discrete Programming: II. The Quadratic Case. *Management Science (Theory), 16*, 1969, No. 1, 14-32.

55. Machine Sequencing via Disjunctive Graphs: An Implicit Enumeration Algorithm. *Operations Research, 17*, 1969, No. 1, 941-957.

56. On the Structure of the Unit Hypercube (with R. Jeroslow). MSRR No. 198, Carnegie Mellon University, August-December 1969.

57. Duality in Discrete Programming. H. Kuhn (ed.), *Proceedings of the Princeton Symposium on Mathematical Programming*, Princeton University Press, 1970, 179-197.

58. Project Scheduling with Resource Constraints. E.M.L. Beale (ed.), *Applications of Mathematical Programming Techniques*, The English Universities Press, 1970, 187-200.

59. Machine Sequencing: Disjunctive Graphs and Degree-Constrained Subgraphs. *Naval Research Logistics Quarterly, 17*, 1970, No. 1, 1-9.

60. Minimax and Duality for Linear and Nonlinear Mixed-Integer Programming. J. Abadie (ed.), *Integer and Nonlinear Programming*, North-Holland, 1970, 385-418.

61. Alternative Strategies for Using Intersection Cuts in Integer Programming. MSRR No. 209, Carnegie Mellon University, July 1970.

62. Intersection Cuts from Maximal Convex Extensions of the Ball and the Octahedron. MSRR No. 214, Carnegie Mellon University, August 1970.

63. Intersection Cuts–A New Type of Cutting Planes for Integer Programming. *Operations Research, 19*, 1971, 19-39.

64. An Intersection Cut from the Dual of the Unit Cube (with V.J. Bowman, F. Glover, D. Sommer). *Operations Research, 19*, 1971, No. 1, 40-44.

65. A Duality Theorem and an Algorithm for (Mixed)-Integer Nonlinear Programming. *Linear Algebra and Its Applications, 4*, 1971, No. 4, 341-352.

66. On the Set Covering Problem (with M. Padberg). *Operations Research, 20*, 1972, No. 6, 1152-1161.

67. Ranking the Facets of the Octahedron. *Discrete Mathematics, 2*, 1972, No. 1, 1-15.

68. Integer Programming and Convex Analysis: Intersection Cuts from Outer Polars. *Mathematical Programming, 2*, 1972, No. 3, 330-382.

69. Canonical Cuts on the Unit Hypercube (with R. Jeroslow). *SIAM Journal of Applied Mathematics, 23*, 1972, No. 1, pp. 60-69.

70. A Note on Outer Polar Cuts from 0-1 Points. MSRR No. 298(A), Carnegie Mellon University, November 1972.

71. Maximizing a Convex Quadratic Function Subject to Linear Constraints (with C.A. Burdet). MSRR No. 299, Carnegie Mellon University, September 1972 - July 1973.

72. A Note on the Group-Theoretic Approach to Integer Programming and the 0-1 Case. *Operations Research, 21*, 1973, No. 1, 321-323.

73. A Constraint-Activating Outer Polar Method for Pure and Mixed Integer 0-1 Programs. P.L. Hammer and G.T. Zoutendijk (editors), *Mathematical Programming in Theory and Practice*, North-Holland, 1974, 275-310.

74. Finding a Minimum Node Cover in an Arbitrary Graph II. The Weighted Case (with H. Samuelsson). MSRR No. 336, GSIA, Carnegie Mellon University, April 1974.

75. A Hybrid All-Integer Algorithm for 0-1 Programming (with H. Samuelsson). MSRR No. 338, Carnegie Mellon University, April 1974.

76. Intersection Cuts from Disjunctive Constraints. MSRR No. 330, Carnegie Mellon University, February 1974.

77. Disjunctive Programming: Properties of the Convex Hull of Feasible Points. MSRR No. 348, Carnegie Mellon University, July 1974. Published as an invited paper with a foreword by G. Cornuéjols and W.R. Pulleyblank in *Discrete Applied Mathematics, 89,* 1998, 3-44.

78. Cross-Branching with Pairs of Cuts from Disjunctive Constraints. W.P. #3-74-75, Carnegie Mellon University, August 1974.

79. Facets of the Knapsack Polytope. *Mathematical Programming, 8*, 1975, 146-164.

80. Intersection Cuts from Outer Polars of Truncated Cubes (with A. Zoltners). *Naval Research Logistics Quarterly, 22*, 1975, 477-496.

81. Disjunctive Programming: Cutting Planes from Logical Conditions. O.L. Mangasarian, R.R. Meyer and S.M. Robinson (editors), *Nonlinear Programming 2*, Academic Press, 1975, 279-312.

82. Set Partitioning (with M. Padberg). B. Roy (ed.), *Combinatorial Programming: Methods and Applications*. D. Reidel Publishing Company, Dordrecht/Boston, 1975, 205-258.

83. A Linear Characterization of Permutation Polytopes. MSRR No. 364, Carnegie Mellon University, July 1975.

84. All the Facets of Zero-One Programming Polytopes with Positive Coefficients (with E. Zemel). MSRR 374, Carnegie Mellon University, October 1975.

85. Nonconvex Quadratic Programming via Generalized Polars. *SIAM Journal of Applied Mathematics, 28*, 1975, 335-349.

86. On the Set Covering Problem: II. An Algorithm (with M. Padberg). *Operations Research, 23*, 1975, 74-91.

87. Bivalent Programming by Implicit Enumeration. J. Belzer, A.G. Holzman and A. Kent (editors), *Encyclopedia of Computer Science and Technology, 2,* M. Dekker, New York, 1975, 479-494. Reprinted in A.G. Holzman (ed.), *Operations Research Support Methodology*, M. Dekker, 1979, 467-483.

88. Facets of One-Dimensional and Multi-Dimensional Knapsack Polytopes. *Symposia Mathematica, XIX*, Academic Press, 1976, 11-34.

89. Set Partitioning: A Survey (with M. Padberg). *SIAM Review, 18*, 1976, 710-760. Reprinted in N. Christofides, A. Mingozzi, P. Toth and C. Sandi (editors) *Combinatorial Optimization*, J. Wiley, 1979, 151-210.

90. Some Valid Inequalities for the Set Partitioning Problem. *Annals of Discrete Mathematics, 1*, 1977, 13-47.

91. Graph Substitution and Set Packing Polytopes (with E. Zemel). *Networks, 7*, 1977, 267-284.

92. Critical Cutsets of Graphs and Canonical Facets of Set Packing Polytopes (with E. Zemel). *Mathematics of Operations Research, 2*, 1977, 15-20.

93. A Node Covering Algorithm (with H. Samuelsson). *Naval Research Logistics Quarterly, 24,* 1977, 213-233.

94. A Note on Duality in Disjunctive Programming. *Journal of Optimization Theory and Applications, 21*, 1977, 523-528.

95. Recommendations for the Overall Size of the Strategic Petroleum Reserve. *Hearing before the Committee on Interior and Insular Affairs, U.S. Senate, 95th Congress*, February 4, 1977. Publication No. 95-10, 491-508.

96. Facets of the Knapsack Polytope from Minimal Covers (with E. Zemel). *SIAM Journal of Applied Mathematics, 34*, 1978, 119-148.

97. Adjacent Vertices of the Convex Hull of Feasible 0-1 Points (with M. Padberg). *Revue d'Automatique, Informatique et Recherche Operationnelle, 13*, 1979, 3-12.

98. Branch and Bound/Implicit Enumeration (with M. Guignard). *Annals of Discrete Mathematics, 5*, 1979, 185-191.

99. Disjunctive Programming. *Annals of Discrete Mathematics, 5*, 1979, 3-51.

100. Set Covering with Cutting Planes from Conditional Bounds. A. Prekopa (ed), *Survey of Mathematical Programming*, Hungarian Academy of Sciences, Budapest, 1980, 393-422.

101. An Algorithm for Large Zero-One Knapsack Problems (with E. Zemel). *Operations Research, 28*, 1980, 1130-1154.

102. Pivot and Complement - A Heuristic for 0-1 Programming (with C.H. Martin). *Management Science, 26*, 1980, 86-96.

103. Choosing the Overall Size of the Petroleum Reserve. W. Ziemba (ed.), *Energy Modeling: U.S. and Canadian Experiences, I*, Martinus Nijhoff Publishers, Boston, 1980, 144-158.

104. Strengthening Cuts for Mixed Integer Programs (with R.G. Jeroslow). *European Journal of Operations Research, 4*, 1980, 224-234.

105. Cutting Planes from Conditional Bounds: A New Approach to Set Covering. *Mathematical Programming Study, 12*, 1980, 19-36.

106. Set Covering Algorithms Using Cutting Planes, Heuristics, and Subgradient Optimization: A Computational Study (with A. Ho). *Mathematical Programming Study, 12*, 1980, 37-60.

107. Valid Inequalities for 0-1 Programming Polytopes (with J.B. Mazzola). MSRR No. 468, Carnegie Mellon University, November 1980.

108. Integer and Fractional Matchings. *Annals of Discrete Mathematics, 11*, 1981, 1-13.

109. The Strategic Petroleum Reserve: How Large Should It Be? B.A. Bayraktar, E.A. Cherniavsky, M.A. Laughton and L.E. Ruff (editors), *Energy Policy Planning*, Plenum Press, 1981, 335-386.

110. A Restricted Lagrangean Approach to the Traveling Salesman Problem (with N. Christofides). *Mathematical Programming, 21*, 1981, 19-46.

111. This Week's Citation Classic: An Additive Algorithm for Solving Linear Programs with Zero-One Variables. *Current Contents, 30*, July 26, 1982, 18-19.

112. A Class of Location, Distribution and Scheduling Problems: Modeling and Solutions Methods. *Revue Belge de Statistique, d'Informatique et de Recherche Operationnelle, 22*, 1982, 36-69. Reprinted in P. Gray and Lin Y. (editors), *Proceedings of the Chinese-U.S. Symposium on Systems Analysis*, Wiley, 1983, 323-346.

113. Integer Programming. S. Kotz and N. Johnson (editors), *Encyclopedia of Statistical Sciences, 4*, Wiley, 1983, 153-164.

114. The Perfectly Matchable Subgraph Polytope of a Bipartite Graph (with W.R. Pulleyblank). *Networks, 13*, 1983, 495-516.

115. A Note on the Weiszfeld-Kuhn Algorithm for the General Fermat Problem (with C.S. Yu). MSRR No. 484, Carnegie Mellon University, March 1983.

116. Traffic Assignment in Communication Satellites (with P. Landweer). *Operations Research Letters, 2*, 1983, 141-148.

117. Benders' Method Revisited (with C. Bergthaller). *Journal of Computational and Applied Mathematics, 9*, 1983, 3-13.

118. Integer Programming. In Kotz and Johnson (editors), *Encyclopedia of Statistical Sciences*, vol. 4. Wiley, 1983, 153-164.

119. Nonlinear 0-1 Programming: I. Linearization Techniques (with J.B. Mazzola). *Mathematical Programming, 30*, 1984, 1-21.

120. Nonlinear 0-1 Programming: II. Dominance Relations and Algorithms (with J.B. Mazzola). *Mathematical Programming, 30*, 1984, 22-45.

121. A Sharp Bound on the Ratio Between Optimal Integer and Fractional Covers. *Mathematics of Operations Research, 9*, 1984, 1-6.

122. Lifting and Complementing Yields All the Facets of Positive Zero-One Programming Polytopes (with E. Zemel). R.W. Cottle, M.L. Kelmanson and B. Korte (editors), *Mathematical Programming*, Elsevier (North-Holland), 1984, 13-24.

123. Statistical Analysis of Some Traveling Salesman Algorithms (with T. McGuire and P. Toth). MSRR No. 501, Carnegie Mellon University, June 1984.

124. Disjunctive Programming and a Hierarchy of Relaxations for Discrete Optimization Problems. *SIAM Journal on Algebraic and Discrete Methods, 6*, 1985, 466-486.

125. On the Facial Structure of Scheduling Polyhedra. *Mathematical Programming Study, 24*, 1985, 179-218.

126. Branch and Bound Methods (with P. Toth). E.L. Lawler, J.K. Lenstra, A.H. Rinnooy Kan and D. Shmoys (editors), *The Traveling Salesman Problem: A Guided Tour of Combinatorial Optimization*. Wiley, 1986, 361-400.

127. Finding a Maximum Clique in an Arbitrary Graph (with C.S. Yu). *SIAM Journal on Computing, 15*, 1986, 1054-1068.

128. A Fast Algorithm for Finding an Edge-Maximal Subgraph with a TR-Formative Coloring. *Discrete Applied Mathematics, 15*, 1986, 123-134.

129. Integer Programming. In *The New Palgrave*, 1986, 870-872.

130. On the Maximum-Weight Clique Problem (with V. Chvátal and J. Nesetril). *Mathematics of Operations Research, 12*, 1987, 522-536.

131. The Assignable Subgraph Polytope of a Directed Graph. *Congressus Numerantium, 60*, 1987, 35-42.

132. Comment on "Some Computational Results on Real 0-1 Knapsack Problems" (with R. Nauss and E. Zemel). *Operations Research Letters, 6*, 1987, 139-141.

133. On the Convex Hull of the Union of Certain Polyhedra. *Operations Research Letters, 7*, 1988, 279-284.

134. The Shifting Bottleneck Procedure for Job Shop Scheduling (with J. Adams and D. Zawack). *Management Science, 34*, 1988, 391-401.

135. Robert Jeroslow (1942-1988). *OR/MS Today*, 1988.

136. On the Set Covering Polytope: I. All the Facets with Coefficients in {0,1,2} (with S.M. Ng). *Mathematical Programming, 43*, 1989, 57-69.

137. Facets of the Three-Index Assignment Polytope (with M.J. Saltzman). *Discrete Applied Mathematics, 23*, 1989, 201-229.

138. On Graphs with Polynomially Solvable Maximum-Weight Clique Problem (with C.S. Yu). *Networks, 19*, 1989, 247-253.

139. Sequential Convexification in Reverse Convex and Disjunctive Programming (with J. Tama and J. Tind). *Mathematical Programming, 44*, 1989, 337-350.

140. The Asymmetric Assignment Problem and Some New Facets of the Traveling Salesman Polytope. *SIAM Journal on Discrete Mathematics, 2*, 1989, 425-451.

141. The Prize Collecting Traveling Salesman Problem. *Networks, 19*, 1989, 621-636.

142. The Perfectly Matchable Subgraph Polytope of an Arbitrary Graph (with W.R. Pulleyblank). *Combinatorica, 9*, 1989, 321-337.

143. On the Set Covering Polytope: II. Lifting the Facets with Coefficients in {0,1,2} (with S.M. Ng). *Mathematical Programming, 45*, 1989, 1-20.

144. Finding Out Whether a Valid Inequality is Facet Defining. In R. Kannan and W.R. Pulleyblank (eds), *Integer Programming and Combinatorial Optimization.* University of Waterloo Press, 1990, 45-60.

145. Combinatorial Optimization in Steel Rolling (with C.H. Martin). *Proceedings of the DIMACS/RUTCOR Workshop on Combinatorial Optimization in Science and Technology (COPT)*, Rutgers University, April 1991.

146. An Algorithm for the Three-Index Assignment Problem (with M. Saltzman). *Operations Research, 39*, 1991, 150-162.

147. A Parallel Shortest Augmenting Path Algorithm for the Assignment Problem (with D. Miller, J. Pekny and P. Toth). *Journal of the ACM, 38*, 1991, 985-1004.

148. Minimum Weighted Coloring of Triangulated Graphs, with Application to Weighted Vertex Packing in Arbitrary Graphs (with J. Xue). *SIAM Journal on Computing, 20*, 1991, 209-222.

149. The Fixed-Outdegree 1-Arborescence Polytope (with M. Fischetti). *Mathematics of Operations Research, 17*, 1992, 1001-1018.

150. *Integer Programming and Combinatorial Optimization.* Proceedings of IPCO 2 (E. Balas, G. Cornuéjols and R. Kannan, editors), Carnegie Mellon University, GSIA, 1992.

151. A Lifting Procedure for the Asymmetric Traveling Salesman Polytope and a Large New Class of Facets (with M. Fischetti). *Mathematical Programming, 58*, 1993, 325-352.

152. Linear-Time Separation Algorithms for the Three-Index Assignment Polytope (with L. Qi). *Discrete Applied Mathematics, 43*, 1993, 1-12.

153. A Lift-and-Project Cutting Plane Algorithm for Mixed 0-1 Programs (with S. Ceria and G. Cornuéjols) *Mathematical Programming, 58*, 1993, 295-324.

154. Solving Mixed 0-1 Programs by a Lift and Project Method (with S. Ceria and G. Cornuéjols). *Proceedings of the 4th Annual ACM-SIAM Symposium on Discrete Algorithms (SODA)*, Austin, TX, 1993, 232-242.

155. On the Monotonization of Polyhedra (with M. Fischetti). In G. Rinaldi and L. Wolsey (editors) *Integer Programming and Combinatorial Optimization*, Proceedings of IPCO 3, CIACO, Louvain-la-Neuve, 1993, 23-38.

156. A New Facet Class and a Polyhedral Method for the Three-Index Assignment Problem (with G. Gwan and L. Qi). In D.Z. Du and J. Sun (editors), *Advances in Optimization and Approximation,* Kluwer Academic Publishers, 1994, 256-274.

157. The Precedence-Constrained Asymmetric Traveling Salesman Polytope (with M. Fischetti and W.R. Pulleyblank). *Mathematical Programming, 68,* 1995, 241-265.

158. The One Machine Problem with Delayed Precedence Constraints and Its Use in Job Shop Scheduling (with J.K. Lenstra and A. Vazacopoulos). *Management Science, 41,* 1995, 94-109.

159. The Prize Collecting Traveling Salesman Problem: II. Polyhedral Results. *Networks, 25,* 1995, 199-216.

160. A Max-Flow Based Procedure for Finding Heavy Cliques in Vertex-Weighted Graphs (with W. Niehaus). MSRR No. 612, GSIA, Carnegie Mellon University, April 1995.

161. *Integer Programming and Combinatorial Optimization,* E. Balas and J. Clausen (editors). Proceedings of IPCO 4. Lecture Notes in Computer Science, Springer Verlag, 1995.
